1-1/2" Jumbo Reserve™

Premium Reserve Cedar Shakes & Shingles

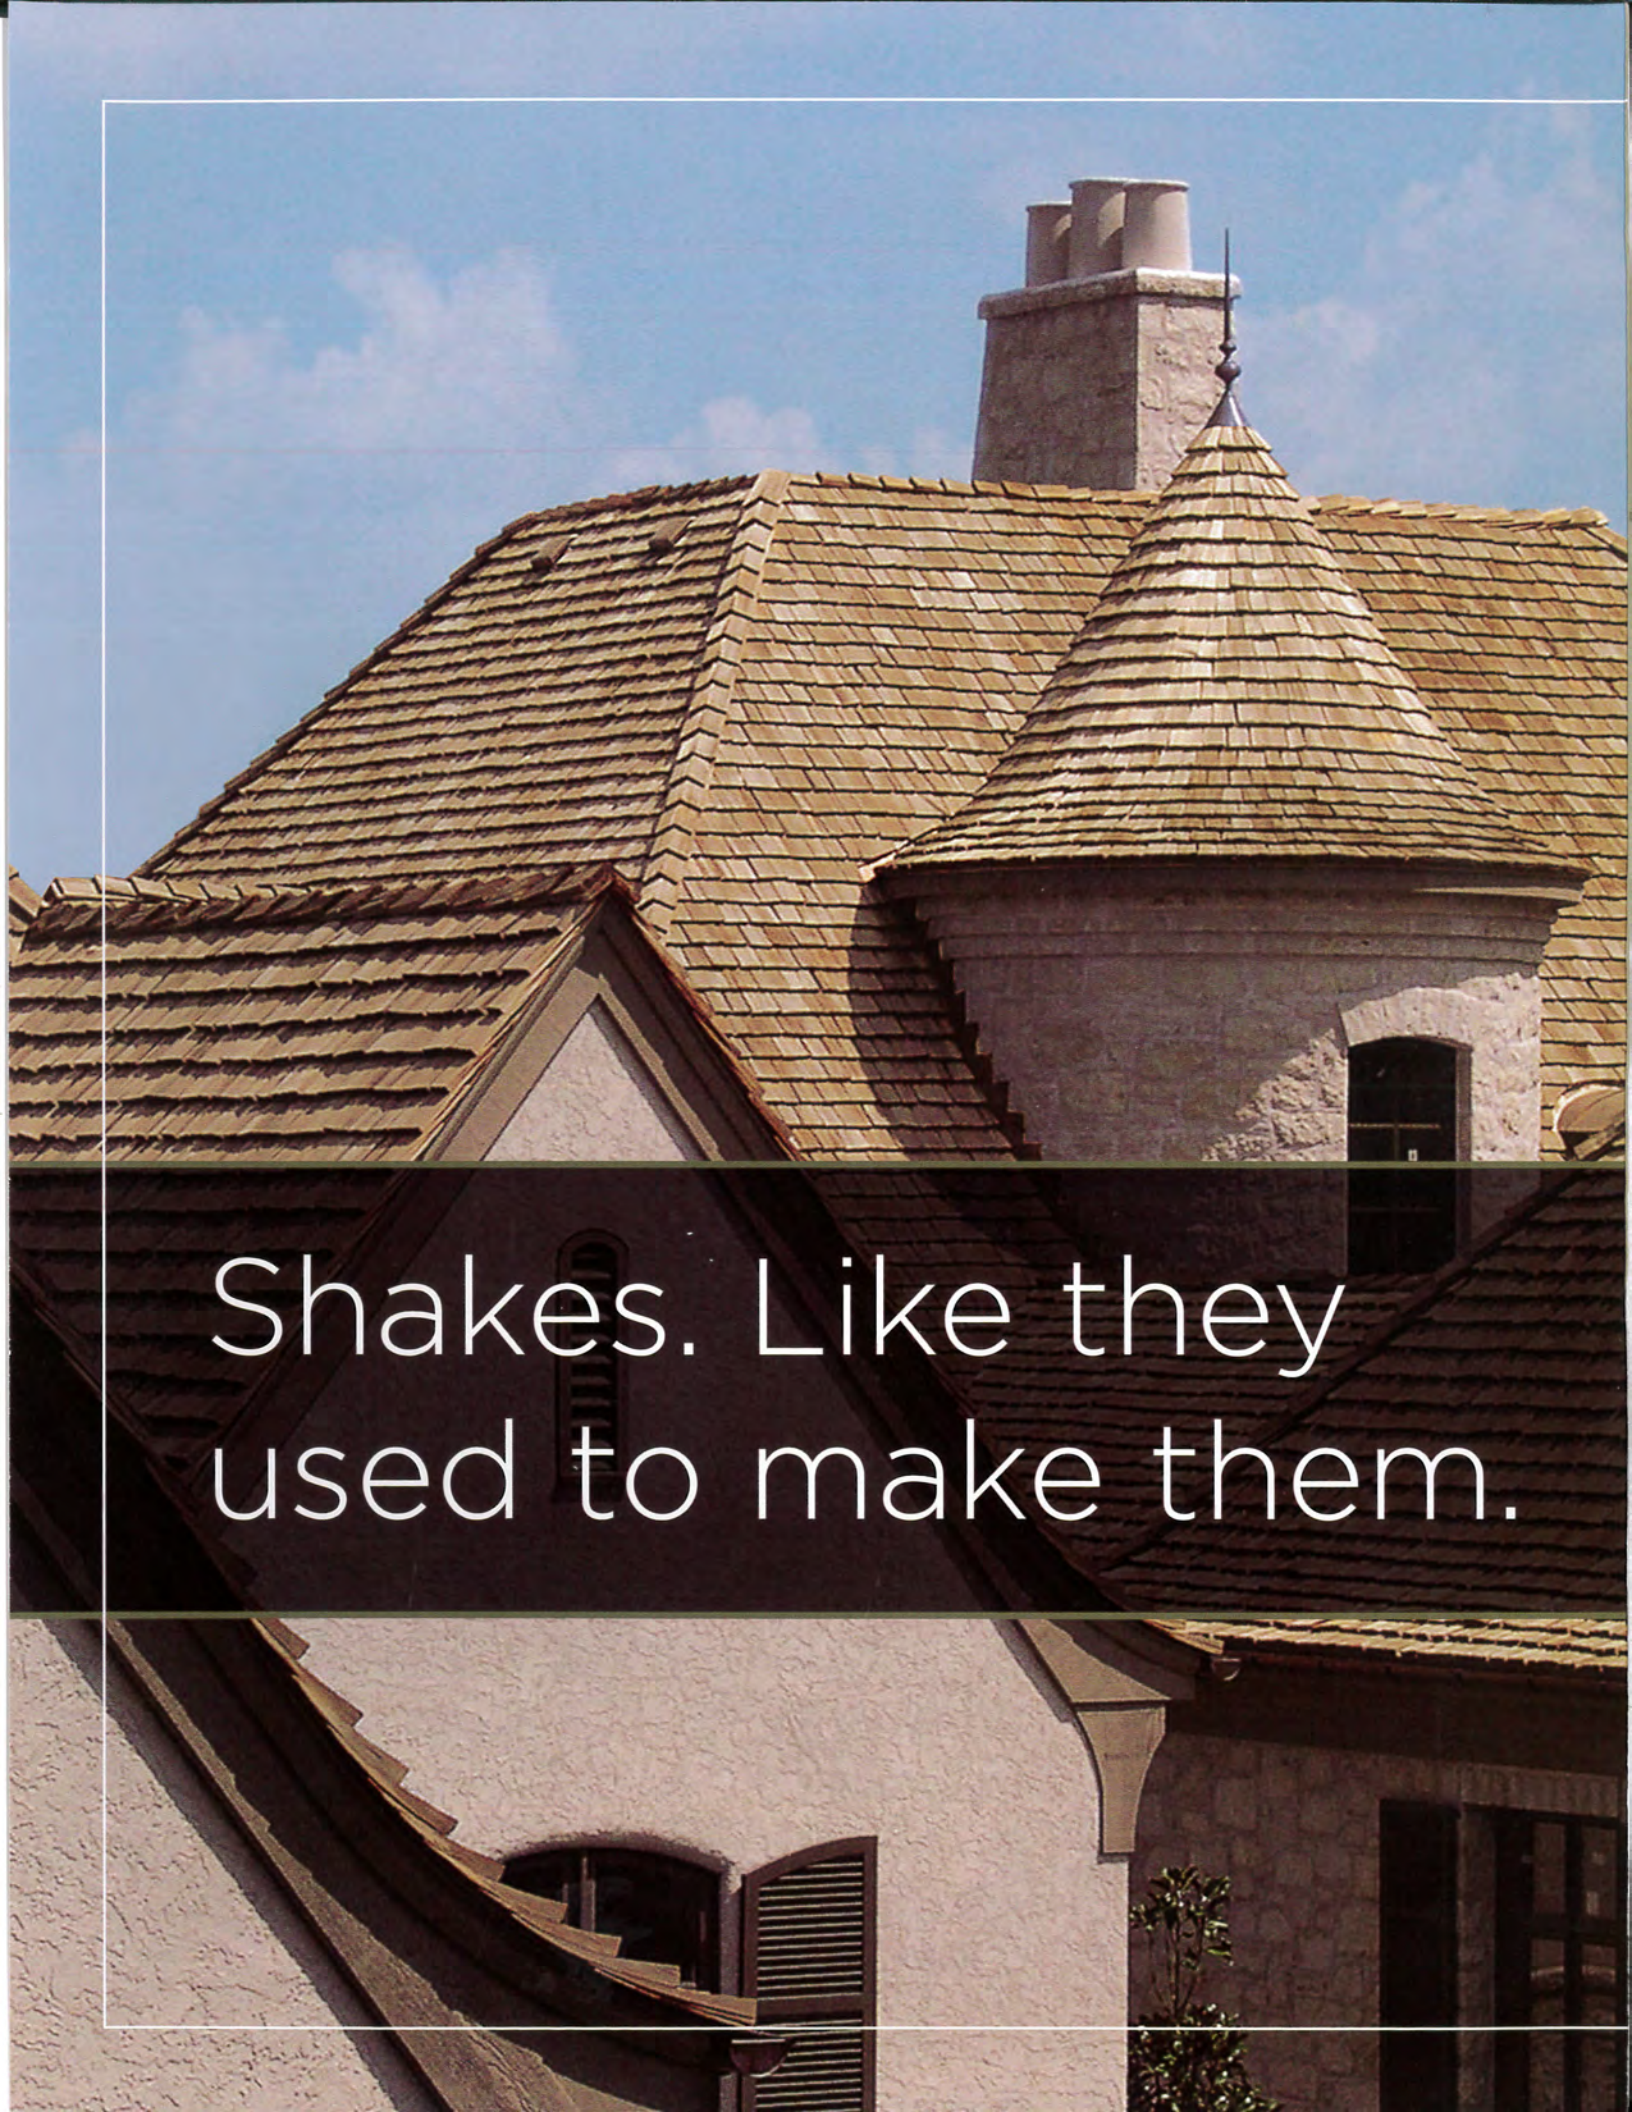

Classic quality you've been looking for.

Cedar shakes have had a timeless appeal for generations. Yet many roofing contractors look back wistfully to 50 or 100 years ago, a time when shakes seemed to be of a superior quality. The thickness and consistency of the materials meant they could last for generations. Today's ordinary shakes won't perform at the same level.

Our Green River™ and Black Hawk™ Reserve Shakes and Shingles give you what you want from your roof. Superior durability. Unmatched beauty. And a range of options to suit a variety of architectural designs.

No other brand gives you a higher level of performance. And no imitation material can duplicate the authentic, warm appearance of genuine Western Red Cedar.

Shakes. Like they
used to make them.

- Natural beauty
- Superior quality and thickness
- Outstanding weather resistance
- Highly insulative
- Lightweight and durable
- Environmentally responsible
- Proven longevity
- Fire resistance

3/4" Reserve Cut™

Reserve Cut™ Shakes

3/4" Thick

These shakes are handsplit and resawn, then each shake is edge trimmed to give you a high quality roof. Shakes are packed with 80% edge grain material and minimum 60% 2-pack.

Premium Reserve™ Shakes

3/4" Thick

These 100% edge grain shakes virtually eliminate splitting and curling. Available handsplit for a rustic style, or tapersawn for a more tailored look. Each shake is edge trimmed for easy application and quality appearance.

Private Reserve™ Shakes

7/8" Thick Butt

The hallmark of cedar shakes, this 7/8" minimum thick butt and 100% vertical grain shake is the envy of the roofing world. Superior to the legendary 3/4 - 5/4" shake, this roof will give your home a rich appeal and enduring quality.

Jumbo Reserve™ Shakes

1", 1-1/4", 1-1/2" or Thicker

These heavy duty shakes are cut a minimum of 1", 1-1/4", 1-1/2" or thicker. Cut to your specifications. These shakes make a statement and will probably be the last roof you'll ever buy.

Reserve Shingles™

18" Perfection™ and 24" Royal Shingles™ are cut to exceed industry standards. Still cut on shingle saws from 1916, these shingles are the same high quality as those found on shingle-style estates from the turn of the century.

Taking Protection One Step Further.

Fire-Retardant Cedar Shakes & Shingles

If you thought cedar wasn't an option in fire hazard areas, think again. Cedar Plus™ gives you superior fire protection without sacrificing the beauty of genuine Western Red Cedar. In a state-of-the-art treatment process, fire retardants are pressure injected into the wood and locked into the fibers. A decade of weathering and regular testing is our assurance the roof remains fire retardant for its entire life.

CEDAR PLUS™ SHAKES MEET UL-790, UBC 15-2, AND NFPA-256 STANDARDS.

State Fire Marshall Listing---4150-1450:100

Preservative Treated Cedar Shakes & Shingles

Imagine a cedar roof with virtually zero maintenance. That's what Cedar Plus CCA™ shakes and shingles give you. Western Red Cedar is naturally durable, but Cedar Plus CCA™ extends that durability even further, giving you long-term protection against weather and decay - ideal in high humidity regions.
